Restriction/election

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 16, 21, 27, 35, 41, 49, 57 and 64 and their dependent claims thereof, drawn to content addressable memory (CAM) device and method, classified in class 714, subclass 718 .
 - II. Claims 46 and 68 and their dependent claims thereof, drawn to a method of controlling a content addressable memory (CAM) device, classified in class 714, subclass 746.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions in Groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the details of Group I have separate utility not dependent upon the limitation of Group II, and via-versa. Specifically, Group II does not require a CAM array including a plurality of CAM cells arranged in rows and columns, a plurality of bit lines coupled respectively to the columns of CAM cells, a plurality of comparand lines coupled respectively to the columns of CAM cells, the plurality of comparand lines being adapted to provide, as part of a compare operation, a comparand value for comparison with data words stored in the rows of CAM cells; and an error detection circuit coupled to receive, via the bit lines, a selected data word from one of the rows of CAM cells and to determine, concurrently with the compare operation, whether the selected data word includes

an error. Group I does not require to receive, from a CAM device that automatically performs error checking operations at a predetermined sequence of error check address, an address of a storage location within the CAM device that contains a corrupted data value; and outputting a write instruction and write data to the CAM device to overwrite the corrupted data value.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phung My Chung whose telephone number is 571-272-3818. The examiner can normally be reached on Monday-Friday.
